

HD Ultra-Wide Field Retina Screening Exam

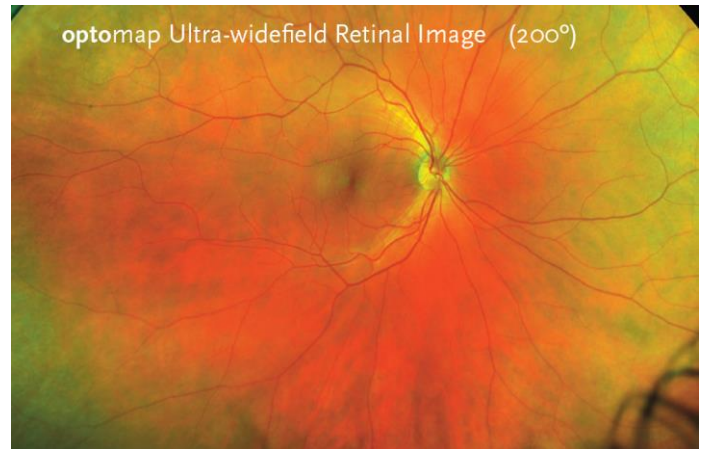

Early detection of eye disease is critical for your eye health

Ultra-Wide Field Imaging is safe, **NEW**, and the most advanced digital retinal examination which improves the doctor's ability to view your retinal health using a high-resolution picture.

- These **Ultra-Widefield Images can be done in place of dilation for most routine visits.**
- Promotes **COVID-19 safety** with less face to face provider contact during retinal exam.
- Our doctors recommend this **ANNUALLY** for adults and baseline then every few years for children.
- Our doctors strongly recommend this for patients with a personal or family history of **MELANOMA, diabetes, hypertension, high cholesterol, glaucoma, macular degeneration, floaters, or retinal detachment.**

Traditional 45° Degree Retinal Imaging

Optos 200° Ultra-Widefield Retinal Imaging

The HD-UWF Retinal Screening Examination is an **additional charge of \$45** to the basic eye exam:

Please note: *Insurance will not cover the HD-UWF Imaging Examination for routine visits.*

_____ I AGREE TO have my retinal health evaluated with the HD-UWF Retina Imaging Exam.

_____ I DO NOT wish to have the HD-UWF Retinal Imaging Exam.
